# Product Questions: 57/3Case Study Version: 8.0

## Case Study

### Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

### Existing Environment

<https://www.dumps4u.com/>

## Requirements

All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	None
User2	None
User3	Customer Lockbox access approver
User4	None

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	Not applicable
Group2	Dynamic	(user.department -eq "Finance")

Microsoft Office 365 licenses are assigned only to Group2.

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

### Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com
- Contoao.adatum.com
- Humongousinsurance.com

### Technical Requirements

Contoso identifies the following technical requirements:

- All new users must be assigned Office 365 licenses automatically.
- The principle of least privilege must be used whenever possible.

### Security Requirements

Contoso identifies the following security requirements:

- Vendors must be able to authenticate by using their Microsoft account when accessing Contoso requirements.
- User2 must be able to view reports and schedule the email delivery of security and compliance reports.
- The members Of Group1 must be required to answer a security question before changing their password.

- User3 must be able to manage Office 365 connections.
- User4 must be able to reset User3 password.

---

**Question: 1**

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.

Solution: From the Office 365 admin center, you assign User2 the Security Reader role. From the Exchange admin center, you assign User2 the Compliance Management role.

Does this meet the goal?

- A. Yes
- B. NO

---

**Answer: B**

---

---

**Question: 2**

---
