## Product Questions Version: 10.0

---

### Question: 1

---

A company plans to migrate to Microsoft 365.

You need to advise the company about how Microsoft provides protection in a multitenancy environment. What are three ways that Microsoft provides protection? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Customer content at rest is encrypted on the server by using BitLocker.
- B. Microsoft Azure AD provides authorization and role based access control at the tenant layer.
- C. Customer content at rest is encrypted on the server by using transport layer security (TLS).
- D. Microsoft Azure AD provides authorization and role based access control at the transport layer.
